

DENVER E-RIBBON FIRE™ F / S

The decoflame® Denver e-Ribbon Fire™ is part of the made to measure range of decoflame® bioethanol fires. Its simple layout makes it versatile and adaptable for a large variety of fireplace applications.

Offering a maximum of creative freedom and in addition to the classic linear form, the Denver e-Ribbon Fire™ can be sculptured in various shapes e.g. along an in- or outside corner, in a U-bend or like an elegantly meandering wavy curve.

Glass shielding to one or more sides of the decoflame® Denver™ are optional for some types of applications – in most cases, however, strongly recommended.

The Denver e-Ribbon Fire™ with CEVB Technology (Controlled Ethanol Vapour Burning) comes with a radio-frequency remote control which allows an adjustment of the flame intensity on six levels. Alternatively, operating the fire via an iPhone/iPad/iPod is possible if a WiFi-Adapter is chosen as optional extra.
